**Brilliant blooms cover lush well branched plants and offer non-stop flowering from late spring through the fall. Bossa Nova Begonias look great either on their own in containers or as component in a combo.**

## ***Begonia sp. 'Bossa Nova Series'***

- **Use:** Brilliant blooms cover the plant from late Spring until frost and the well branched plants look stunning in a large container or hanging basket, either singly or as part of a combo. Tips: Make sure they don't have too much shade or they will bloom less frequently and the blooms will be smaller. Water in the morning before it gets too hot to avoid scorching or a couple of hours before sunset to allow the leaves to dry and avoid mold.
- **Exposure/Soil:** Performs well in full sun to part shade (Although easier to keep watered at temps over 90 in some shade). Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Good drainage is a must.
- **Growth:** Grows 12-16" tall and 16-20" wide, maybe taller if in more shade or rich soil.
- **Hardiness:** Zone 9-11, annual, houseplant
- **Foliage:** Dark green wing-shaped leaves and will spill over the sides of containers or form nice mounds on the ground.
- **Flower:** Beautiful, almost luminescent color blossoms from spring until fall frosts.
