

FloraMia Limon Wedge Potato Vine

Ipomea batatas 'FloraMia Limon Wedge'

- **Use:** Our interest in these Sweet Potatoes is not in the edible roots (which tend to be starchier than store bought types) but in the attractive foliage of our two ornamental varieties. Their large and colorful leaves cascade from containers in a seemingly endless stream all summer long, and their trailing habit makes them equally useful as striking, short-term ground covers or as skirts for upright plants.
- **Exposure/Soil:** Plants thrive in full sun or partial shade with consistent moisture. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Super fast grower trails only 4-8" tall and vigorous growth to 24-36" long vines of foliage.
- **Hardiness:** Zone 9-10 ; Annual in this zone unless you dig up the potatoes and store them in the garage over winter.
- **Foliage:** Elongated wedge-shaped lime green colored leaves that start with red margins on this excellent selection of sweet potato
- **Flower:** Not very noticeable flowers.

Overall Rating

4.67

Great rating from 2020 UGA Trial Gardens. Plant with Million Bells and Wave Petunias for a stunning contrast in shape and shade.
