

# Pink Princess Philodendron

This plant filters pollutants from the air while releasing oxygen. With this plant in your home, you breathe cleaner air.

## *Philodendron 'Pink Princess'*

- **Use:** One of the trendiest plants on social media, this climbing vine shows off bronze-green leaves variegated with streaks and splashes of pink. It's a relatively slow grower but makes a stunning houseplant in any bright room. The plant shows you when it's not happy, which makes it the perfect plant for beginners. Also great for on a patio or semi shady location outside when temps are above 60 degrees. Keep away from kids and pets.
- **Exposure/Soil:** Grows well in bright indirect light. In lower light the leaves turn a darker green. Too much light or direct sun burns the leaves or causes the deep green color to fade. likes moist but not soggy soil. During the winter, water less often, keeping the soil barely moist. Do not let plant stand in water in saucer either. Feed monthly during the spring, summer, and fall with a water-soluble balanced fertilizer diluted to ½ the recommended strength. Too much plant food causes excess salt build up in the soil and can cause leaf burn.
- **Growth:** A slow-growing houseplant, it makes for an excellent addition to your favorite desk or tabletop when young. As it matures, it can reach 3-4 feet tall and 1-3' wide or so as a houseplant.
- **Hardiness:** Zone 10-12 Annual; Houseplant, must bring inside in the winter or when temps go below 60 degrees.
- **Foliage:** The heart-shaped leaves are dark purplish-green with contrasting pink variegation and can reach up to 8" long and 5" wide. The pink coloration is variable, emerging as large splotches, small streaks, or occasionally an entire leaf.
- **Flower:** Not known for flowers.
