Hibiscus 'Dark Mystery'

- **Use:** There's no mystery here – this Hibiscus has proven season after season to be a superior performer. Incredibly dark, wine purple foliage contrasts beautiful with the large 8-9" white flowers. Each flower has a cherry red eye and dark pink veining. Heart-shaped leaves cover the round habit. Perfect for use in large gardens, landscapes, or any place where you want to make an impact statement. Be patient though as they tend to leaf out in May when soil temps have warmed up.
- **Exposure/Soil:** Plant in full sun to partial sun. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers for best results. Prefers to be watered under the leaves.
- **Growth:** Full, well branched plants grow QUICKLY to 5-5.5' tall and wide in one season.
- **Hardiness:** **Zone** 4-9 Perennial. Very heat tolerant!
- **Foliage:** Deciduous; Dark foliage is a stunning foil in the garden.
- **Flower:** The huge 8-9" wide ruffled white flowers sporting darker pink veining with a dark burgundy eye shine like spotlights against the foil of dark burgundy to near black foliage and are produced throughout summer. An indeterminate plant producing flowers from the top to the bottom of the plants creating a knockout display in the garden and landscape.
