

# GoldiPhlox™ Rose Creeping Phlox

**DROUGHT  
TOLERANT!**  
Carpets  
hillside in  
blossoms.  
Good for  
erosion  
control.

## *Phlox subulata* 'GoldiPhlox™ 'Rose'

- **Use:** The GoldiPhlox™ series of *Phlox subulata* is a lovely evergreen groundcover that blooms profusely in the spring. Deer resistant. Attracts butterflies, hummingbirds and pollinator bees to the garden. Drought and salt tolerant once established. Great for erosion control on embankments. Plant a carpet of color! Beautiful masses of flowers topping creeping stems make an attractive ground cover or accent in a rock garden. Excellent bank cover. Tolerates some drought.
- **Exposure/Soil:** Sun– part sun, very easy to please. Provide well-drained, moist soil, but not soggy. Use a slow release fertilizer. Superb in borders, beds, and open woodland gardens.
- **Growth:** Moderate grower to 3-6 in. tall, 1 ft. wide
- **Hardiness:** Zone 3-8, perennial
- **Foliage:** Evergreen. Small trailing leaves.
- **Flower:** Pour on the bright pink color in late winter –early summer with a shower of flowers. We find that a very light shearing of flowers after they finish blooming can help with even more reblooming and creates fuller plants.
