

# Night Light™ Chamaecyparis

**Collector's plant!  
Excellent for  
adding interest  
to your garden!**

## ***Chamaecyparis obtusa* 'Conschlecht' PP24666**

- **Use:** Excellent foliage that becomes a nice bronze color in the winter months. Nice dense, rounded habit. No burn has been noticed during outdoor trials in full sun. The most inner part of the leaves retains a green color.
- **Exposure/Soil:** Full/part sun and could tolerate a fair amount of shade, but then may lose golden color; well-draining soil and appreciates slow release fertilizer.
- **Growth:** Slowly maturing to 4' tall by 5' wide; the golden-yellow color stays that way if the plant is sited in full sun. Can be kept shorter with yearly pruning.
- **Hardiness:** Zone 5-8; shrub
- **Foliage:** Evergreen. Excellent golden foliage that becomes bronze in winter, while the inner foliage stays green.
- **Flowers:** Not known for flowers.
