

Pillow Talk® Gardenia

Gardenia jasminoides 'SMNGDUO' PP35036

- **Use:** Pillow Talk gardenia will keep your garden from hitting snooze. Arriving in abundance in the springtime, its thick-petaled glowing white blooms almost cover the shiny evergreen foliage. With a wider-than-tall habit, it makes a great addition to the front of the border. This positioning also makes it easier to enjoy the spicy, floral scent!
- **Exposure/Soil:** Full sun (only with good irrigation system)/part sun preferred; well-draining soil and appreciates slow release fertilizer. Water regularly when top 3in of soil is dry. Must amend the soil if you have red clay! We recommend our promix with **coconut peat soil mix**.
- **Growth:** Moderate, spreading grower to 30-42" tall and 36-48" wide.
- **Hardiness:** Zone 7a-10b; Shrub
- **Foliage:** Evergreen; The dense, lustrous dark green foliage looks gorgeous all year long.
- **Flowers:** The large 3-4 inch, double white blooms are delightfully fragrant and line the plant from top to bottom.

A *Gardenia jasminoides*, commonly called gardenia or cape jasmine, Pillow Talk has a compact, low-mounded habit that makes a gorgeous specimen or container plant and a lovely addition to beds and borders.
