

Abbey's Re-View® Rhododendron

**Makes an excellent accent,
specimen, or mass planting.**

Rhododendron GREARV'

- **Use:** Flower similar to the cultivar P.J.M., with the added advantage of being very heat resistant. Flowers are pinkish lavender with darker blotch, openly funnel-shaped, wavy edges, about 1½" across, fragrant. Blooms twice a year: early season and again late. The evergreen foliage takes on a mahogany-brown winter color. This variety is noted for its tolerance for heat as well as cold. An excellent choice for borders, mass plantings, or containers.
- **Exposure/Soil:** Part sun (morning sun/afternoon shade preferred) to shade. As with other Rhododendrons, the partial shade of tall trees overhead is the ideal. It will adapt to full-sun sites, though. You just need to water it during times when it isn't raining enough. Grows best in moist, well-drained, organic soils with a pH range from 4.5 to 6.0. "Well-drained" is the key. Planting it in places that don't drain well is a sure death sentence.
- **Growth:** Grows 6-8' tall and wide.
- **Hardiness:** Zones 4-8 Shrub
- **Foliage:** Evergreen. Leaves elliptic, acute apex, cuneate base, glossy, dark green. Pest and disease resistant.
- **Flower:** Large 3-3.5" lavender flowers. Draped in stunning clusters of lightly-scented fuchsia trumpet-shaped flowers with lavender overtones at the ends of the branches in **early spring and then again in the fall.**
