

Bigfoot™ Cleyera

Great as a moderate-fast screen between homes to obstruct neighbor's view.

Ternstroemia gymnanthera 'Sotall' (Bigfoot)

- **Use:** Foliage is a lustrous dark green. Dense and pyramidal growth habit makes a good screen or hedge. Beautiful, leathery leaves look as though they've been polished! Attractive, basic landscaping shrub, informal hedge or large container plant. Heat and pest tolerant. Somewhat deer resistant, but deer may nibble new growth.
- **Exposure/Soil:** Full to partial sun. Prefers well-draining soil and appreciates slow release fertilizer. Water when top 3 in of soil is dry.
- **Growth:** Fast grower to 15-20' tall and 5-6' wide.
- **Hardiness:** Zone 7a-10b; Shrub or Houseplant. We recommend you plant them on a protected wall away from extreme winter cold. We have had ours for 5 years, however, with no problems!
- **Foliage:** Evergreen; Glossy evergreen leaves.
- **Flowers:** Fragrant, small, creamy-white flowers appear in loose clusters at the ends of the branches or from the joint between the leaves and the stems in late spring or early summer. Blue, fleshy holly-like fruits follow the flowers and persist through winter.
