

Miracle Premium Coral Bells

Bold leaves emerge chartreuse and spotted with shades of red wine, gradually aging to a deep red except along the margins, which retain a contrasting greenish-gold tone.

Heuchera x 'Miracle'

- **Use:** A hot new variety that truly is a miracle in Heuchera breeding! The plant goes through several changes in leaf coloration throughout the seasons. Try planting near a walkway or in a container where passerby's can enjoy its beauty up close. Tolerant of high heat and humidity!
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Fast growth to 12-18 "tall, 20" in bloom overall, by 12-18" wide.
- **Hardiness:** 4-9; Perennial
- **Foliage:** Semi-evergreen. In the spring, the young foliage is chartreuse with a heavy smattering of reddish purple in the center. As the foliage matures, it turns brick red with a bright chartreuse to gold edge and silver undersides.
- **Flower:** Pale flower spikes stand above the foliage in summer.
