

# Coral Bells Stormy Seas

## *Heuchera x 'Stormy Seas'*

- **Use:** A gorgeous mound of glossy purple foliage is a guaranteed stand-out. An extremely vigorous form that is widely adaptable. A supreme accent for small space gardens. Mass for a powerful sea of purple or mix with other green leaf coral bells for variety. The perfect plant to inject vitality into pots and baskets.
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Fast growth to just 18 inches tall, 36 inches in bloom overall, by 36 inches wide.
- **Hardiness:** 5-8; Perennial
- **Foliage:** Fancy ruffled leaves display shades of lavender and pewter in varying light. Semi-evergreen.
- **Flower:** Blooms in early summer with wiry stems of tiny pink fairy flowers, but plants are chiefly valued for foliage.

**We love the strength and versatility of this plant. They really add color to containers!**
