

Neon Stonecrop

Sedum spectabile 'Neon'

- **Use:** An old-fashioned perennial with cabbage-like rosettes of succulent foliage throughout summer. Towards mid-summer, flat tightly-packed heads of green buds appear just above the foliage; these form a feature in their own right, and floral artists often cut them at this stage. In late summer the buds gradually open to reveal masses of tiny flowers, in this variety bright rose-magenta. They are highly attractive to butterflies, and several species can be found crowding over the flowers, making an additional attraction in the autumn garden.
- **Exposure/Soil:** Needs to be planted in full sun in well-drained soil. It will tolerate most soil types and is drought resistant.
- **Growth:** Grows 18"-20" tall and spreads 18-24" tall.
- **Hardiness:** Zone 3-10; Perennial
- **Foliage:** Deciduous. The dark gray-green foliage makes this plant attractive in any garden.
- **Flower:** Topped with large heads of neon bright pink flowers from August to September.

Drought tolerant and so easy to grow!
