Juniperus chinensis (davurica expansa) 'Parsonii'

- **Use**: This is one of the more popular evergreens for bonsai. Prune each spring to summer two times to keep pom pom ball shapes.
- **Exposure/Soil**: Full sun to part sun. Use slow release fertilizer for best results. Water if it hasn’t rained in 2 weeks. Needs weekly watering in containers (Get a water meter.) Drought tolerant when established.
- **Growth**: This is a low growing, spreading variety of Juniper with a dwarf mounding habit spreading up to 5’ in width, but only reaching a maximum of 2-3’ in height in two growing seasons.
- **Hardiness**: 6-8, shrub
- **Foliage**: Evergreen. Fragrant bluish foliage.
- **Flower**: Not known for flowers.

Excell ent for a formal look in your garden.
